The ViewPlus Delta: Power-Dot™ Braille with TigerPlus Graphics

- Power-Dot Braille, the strongest, most reliable and most readable Braille dot of any desktop Braille printer
- The Delta utilizes 13 impact devices to emboss Braille and High-Resolution Tactile Graphics with variable dot heights
- Produces double-sided Braille with smooth, rounded dots for improved readability
- Provides input for cut sheet paper of up to 12-inch width
- Provides easy connectivity and setup

The Braille dot produced by ViewPlus embossers can be adjusted in height, allowing users to adjust to the individual sensitivity of the reader's fingertip. This makes extended Braille reading more enjoyable, while maintaining unsurpassed detail in producing tactile graphics.

The Delta features the TigerPlus technology, which allows users to choose between different Braille dot spacing standards to be embossed along with 100 DPI resolution tactile graphics. The wider paper format will help to adjust detailed tactile graphics to a low sensory resolution, helping the visually impaired to get a better grasp on the information.

The unique feature to tactile graphics produced with ViewPlus embossers is the touchable representation of colors through variable dot heights. What you see on the screen is what ViewPlus embossers will print, producing lower tactile dots for lighter colors and higher tactile dots for darker colors.

ViewPlus solutions include Windows printer drivers that will allow embossing directly from Windows programs, utilizing the same process as printing to mainstream color printers. Additionally, direct printing from Braille note takers is also supported.

Though all ViewPlus embossers are compatible with other Braille translation software, like Duxbury, and RTFC, ViewPlus also offers the Tiger Software Suite (TSS) for Braille translation, tactile graphics design and more. TSS comes FREE with ViewPlus embossers and allows the user to create Braille documents in standard Windows programs such as MS Word and Excel without needing to know Braille.

The tactile graphics editor, Tiger Designer, which is part of the TSS package, allows editing of the print data visualized on screen in 1-to-1 correlation as it would appear on the embossed output.

Specifications:

- Print Speed: Up to 120 CPS
- Printing Mode: Single sided or double sided (Interpoint)
- Tactile Mode: 100 DPI
- Minimum Dot Spacing: 1/17 in
- Tactile Graphic Dot Heights: Variable for color representation
- Braille Dot Heights: Adjustable in 3 heights
- Braille Dot Spacing: Adjustable to 5 international standards
- Paper Width: 7 – 12 in (176 - 305 mm)
- Paper: Cut Sheet (50+ sheets)
- Paper Weight: 33 - 120 lb (90 - 200 gsm)
- Connection: USB (1.1, 2.0), Ethernet, Bluetooth (with Tiger Box)
- Compatibility: Current Windows operating systems, Mac OS 10.9+
- Height: 6.2 in (158 mm)
- Width: 21.9 in (557 mm)
- Depth: 10.8 in (275 mm)
- Weight: 19.8 lbs (9 kg)
- Recommended Temperature: 59 - 95 °F (15 - 35 °C)
- Storage Temperature: -4 - 158 °F (-20 - 70 °C)
- Humidity: 20 - 80% RH (non-condensing)
- Energy Supply: 85- 264 VAC 50/60 Hz (+/- 3%)
- Standby: 20 W
- Heavy Embossing: 200 W
