

EmBraille

Print Speed: Up to 25 CPS

Printing Mode: Single-sided

Tactile Resolution: 100 DPI

Minimum Dot Spacing: 1/17in

Tactile Graphic Dot Heights:
Variable for color representation

Braille Dot Heights: Adjustable in
3 heights

Braille Dot Spacing: Adjustable to
5 international standards

Paper Width: 3 – 8.5in (77 –
216mm)

Paper: Continuous tractor feed or
single sheet feeder

Paper Weight: 30 – 108lb (50 –
175gsm)

Connection: USB (1.1, 2.0),
Ethernet, Bluetooth and Wi-Fi
(with TigerBox)

Compatibility: Current Windows
operating systems, Mac OS 10.9+

Height: 6.25in (159mm)
Width: 14.13in (359mm)
Depth: 11.2in (285mm)
Weight: 11 lbs (5kg)

Recommended Temperature: 41
– 95 °F (5 – 35 °C)

Humidity: 20 – 80% RH (non-
condensing)

Energy Supply:
100 – 120 V, 220 – 240 V
50/60 Hz (+/- 3%)

Standby: < 4W
Heavy Embossing: < 85W

The ViewPlus EmBraille: The World's Lowest Cost Braille Embosser

- **Low Cost:** The EmBraille incorporates a cost-effective technology using a polymer platen.
- **Enhanced Readability:** Produces smooth, rounded Braille dots for improved readability.
- **Portability:** Compact and lightweight, easy to take along.
- **Versatility:** Provides input for both endless tractor fed and single cut sheet paper.

The EmBraille is especially designed to provide a low cost, easy to operate solution for printing braille. The EmBraille technology, using a polymer platen, creates smooth, rounded dots allowing extensive braille reading without straining your fingertip.

Tactile graphics using variable dot heights will be produced combined with braille text, utilizing the same setup and printing process as mainstream color printers under Windows operating system. Now the EmBraille also features the TigerPLUS technology, which allows to choose between different Braille dot spacing standards to be embossed along with 100 DPI resolution tactile graphics.

In legacy mode, the EmBraille will also work with braille notetakers.

Endless tractor feed paper, or single standard cut sheets can be used with the EmBraille to meet the user's printing needs.

The compact and lightweight EmBraille is the ideal solution to take along on travels as well. A portable travel case with pull-out handle and wheels is also available through ViewPlus.

All ViewPlus embossers are compatible with other braille translation software, including Duxbury, Braille2000, and RTFC. However, we proudly offer the Tiger Software Suite (TSS) for braille translation, tactile graphics design, and more — at no additional cost with any ViewPlus embosser purchase. With TSS, users can seamlessly create braille documents in widely used Windows programs like MS Word and Excel, even without in-depth braille expertise.

Included in the TSS package is Tiger Designer, a tactile graphics editor that empowers users to edit print data visualized on-screen, ensuring it aligns flawlessly with the embossed output.
