Connection: USB or Ethernet connection

Compatibility: Current Windows operating systems, Mac OS 10.9+

Height: 6.5in (165mm)
Width: 21.5in (546mm)
Depth: 8.0in (203mm)
Weight: 15.2lb (6.9kg)

Produce Your Own Full-COLOR Inclusive Content

- Seamlessly integrate interline ink text with braille, minimizing overhead.
- Produce vibrant tactile graphics with full-color ink in a single pass.
- Ideal for producing inclusive content in high-demand environments.
- Facilitate collaboration between visually impaired and sighted individuals.
- Boost productivity with an economical, high-efficiency solution.
- Simplify your workflow with user-friendly connectivity and setup.

The ViewPlus Color InkConnect marks a significant milestone in the evolution of braille printing and education tools. As the demand for inclusive educational and professional materials, especially in the STEAM fields, reaches new heights, the Color InkConnect delivers! The addition of **COLOR** to our renowned tactile graphics and braille output enhances collaborative opportunities for educators and students alike, enabling shared experiences across the visual spectrum.

Paired with the Elite 200, the Color InkConnect boasts unparalleled ease-of-use, with the ability to translate color into varied dot heights or patterns/textures, seamlessly. Users can craft content in familiar software environments like Microsoft Word, Adobe Illustrator, and CorelDraw, complemented by the versatile Tiger Software Suite for braille integration, including auto-generated interline text.

Continue using one of our other embossers like a SpotDot or perhaps a Delta or Rogue Sheet in a 2-pass printing system, or why not check out the new Color InkConnect now? This powerhouse of productivity enhances quality while drastically reducing the time involved in creating accessible content.

Standing head and shoulders above other market offerings, the Color InkConnect redefines value, challenging the status quo of microcapsule and UV ink alternatives with its standard paper and inkjet capabilities. It also supports double-sided braille and wide-format paper, unlocking new creative possibilities.

In short, the Color InkConnect is a game-changer: enabling high-volume, efficient production to add ink and color, without compromise. We believe that the Color InkConnect is another step towards a more connected and accessible world, where color serves as a bridge, not a barrier.
